Boletim de Eventos Críticos

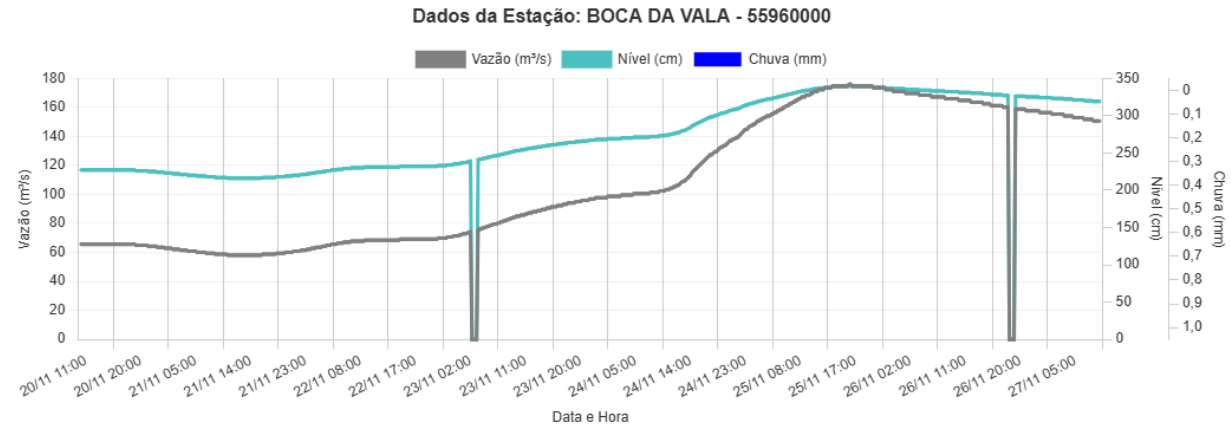

Sala de Situação – AGERH/ANA

27/11/2026

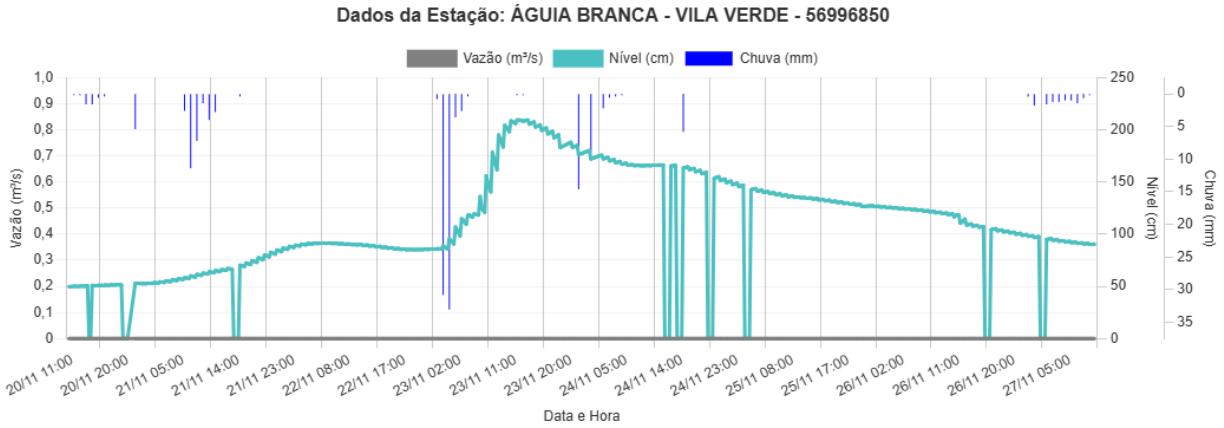

CENÁRIO HIDROLÓGICO

Este boletim apresenta o acompanhamento das vazões e níveis registrados entre 20/11 e 27/11/2026, com foco na avaliação das condições dos cursos d’água diante da ocorrência de chuvas intensas e possíveis eventos de inundação. São apresentadas as variações ao longo do período, buscando identificar elevações significativas, tendências de aumento e situações que possam indicar risco hidrológico.
